

MERCEDES-BENZ Maintenance System

Like any other mechanical equipment, the vehicle requires care and maintenance.

A maintenance booklet is delivered with your car listing all the maintenance jobs that must be carried out after the following mileages:

- Once after 300—600 miles (500—1,000 km)
- Once after 6,000 miles (10,000 km)
- After 12,500 miles (20,000 km) thereafter after every 12,500 miles (20,000 km), but at least once a year.

We would also like to draw your attention to the hints contained in the maintenance booklet covering necessary lubrication and brake inspections every 6,000 miles (10,000 km), additional maintenance jobs every 37,500 miles (60,000 km) and MB individual maintenance as required.

Renew brake fluid once a year, preferably in spring. Use only recommended brake fluids.

The vehicle must receive the prescribed maintenance and/or lubrication work at the specified intervals as listed in the maintenance booklet. Verification of performance of such maintenance/lubrication work should be recorded in the spaces provided in the maintenance booklet.

The maintenance jobs are described in detail in a manual which you can order from your MERCEDES-BENZ service station.

A small sticker attached to the door post of the driver's door by the service station personnel is to remind you when the next maintenance service or lubrication and brake inspection is due.

Maintenance service

Lubrication and
brake inspection

Severe Operating Conditions

In the case of severe operating conditions or heavy use mainly in city traffic or over short distances, frequent mountain driving, poor roads, dusty and muddy conditions, trailer operation, hard and sporty driving, etc. it may be necessary to inspect e.g.

- the front axle brake linings
- the ignition system
- the tires

at shorter intervals.

Any MERCEDES-BENZ service station will be pleased to give you expert and individual advice.
