

Removal

1 Remove air filter (not required for engines 110.98, 616 and 617).

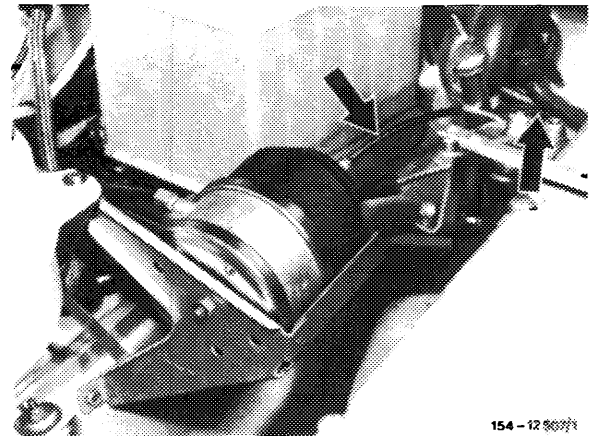

2 Push control lever (7) forward and disconnect clip (8) of wire strand.

3 Remove lock (10) on clips (9) of cable control envelope.

4 Compress clips (9) of cable control envelope and take control out of bracket.

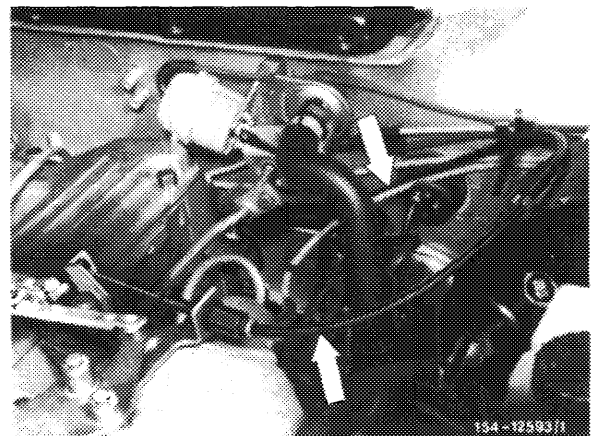

5 Loosen cable control from fastening members of engine and body and remove.

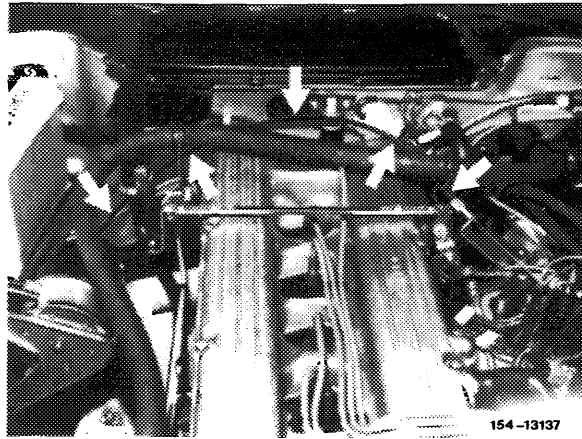

Install cable control model 107.022/042 with electronic injection system from throttle servo unit to front wall.

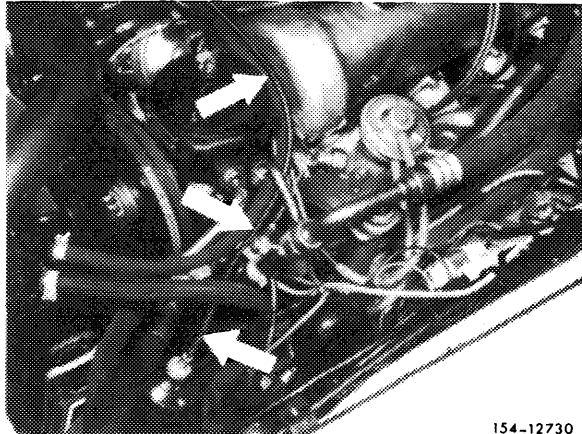

Install cable control model 107.022/042 with electronic injection system from front wall to control

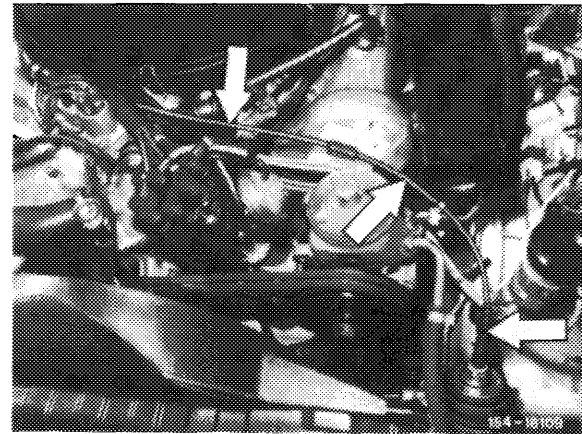

Install cable control model 107.022/043 with CIS injection system from front wall to control.

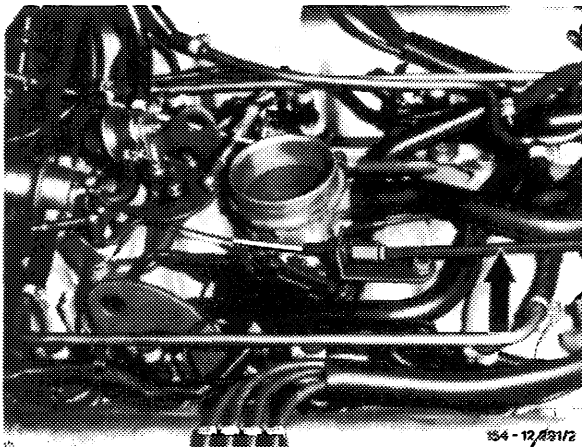

Install cable control model 107.023/024/043/044 from actuator to engine.

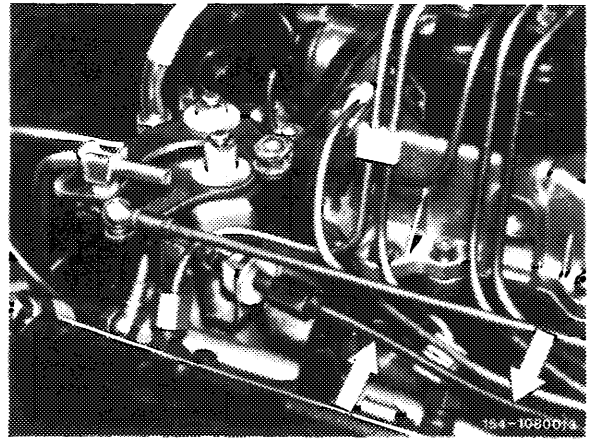

Install cable control model 107.026 from actuator to engine.

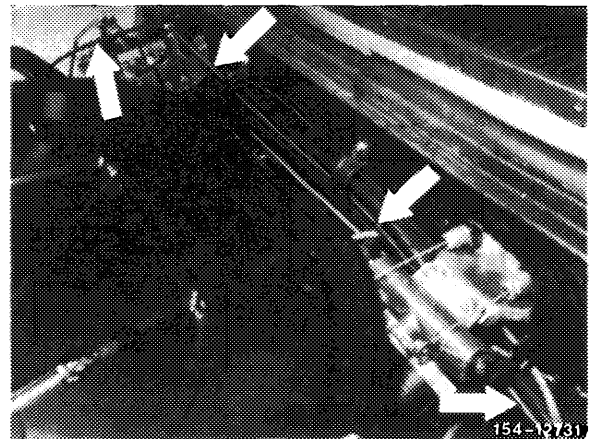

Install cable control model 107.023/024/043/044 with electronic injection system on engine.

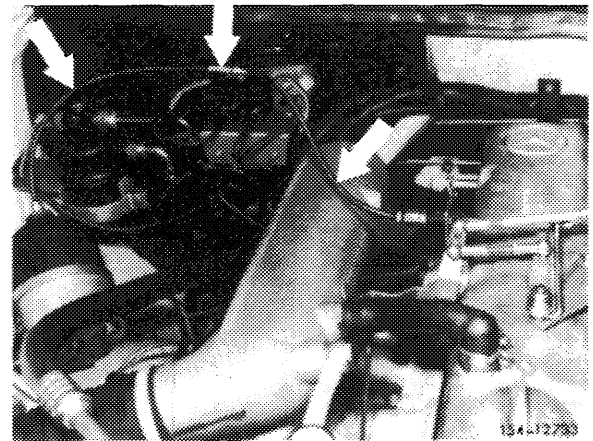

Install cable control model 107.023/024/026/043/044 with CIS injection system on engine.

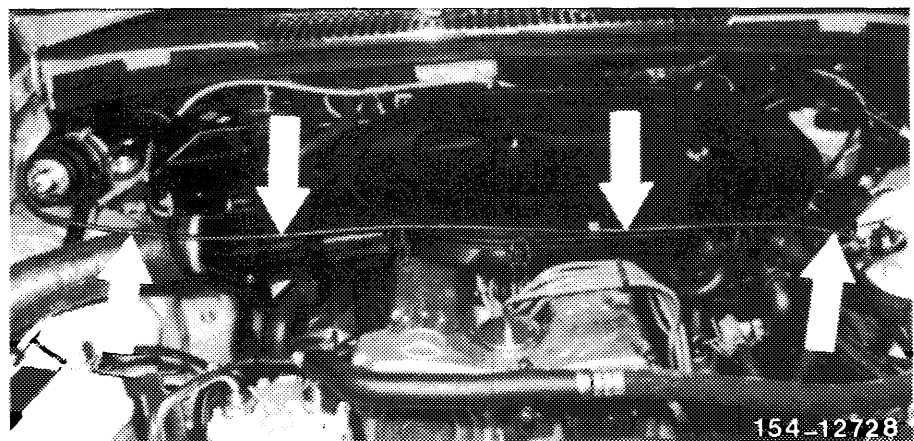

Install cable control models 114.060/073 on front wall

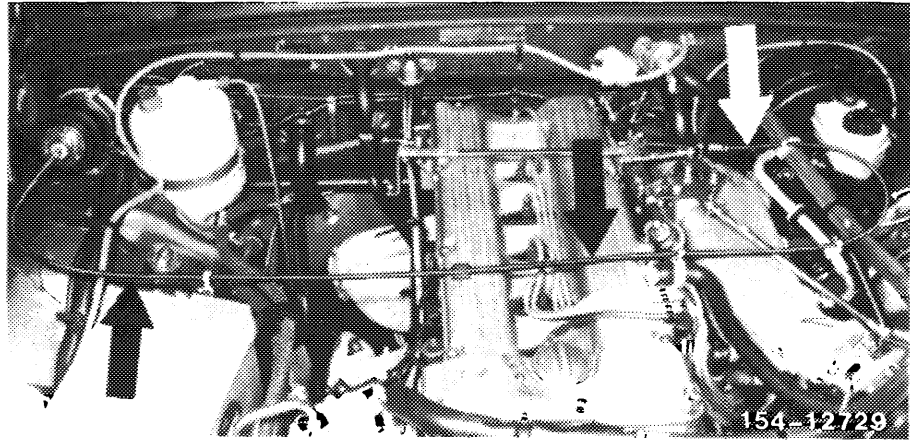

Install cable control model 115.114

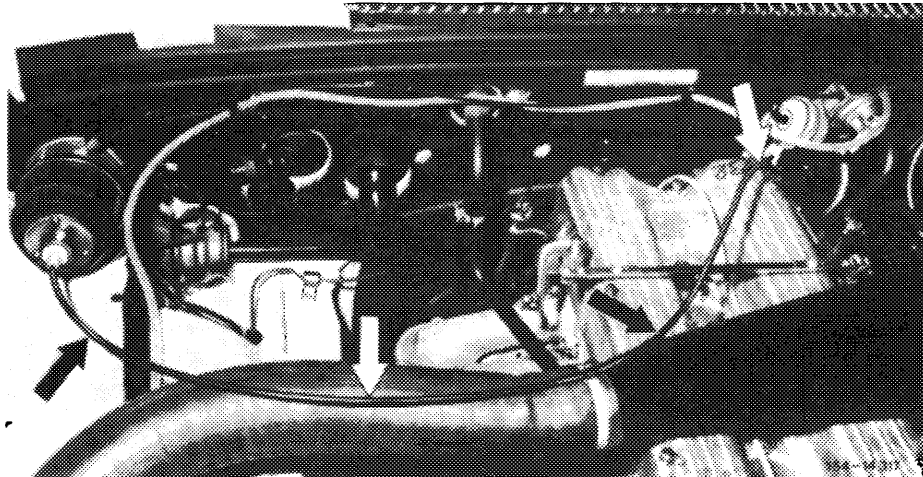

Install cable control model 116.020

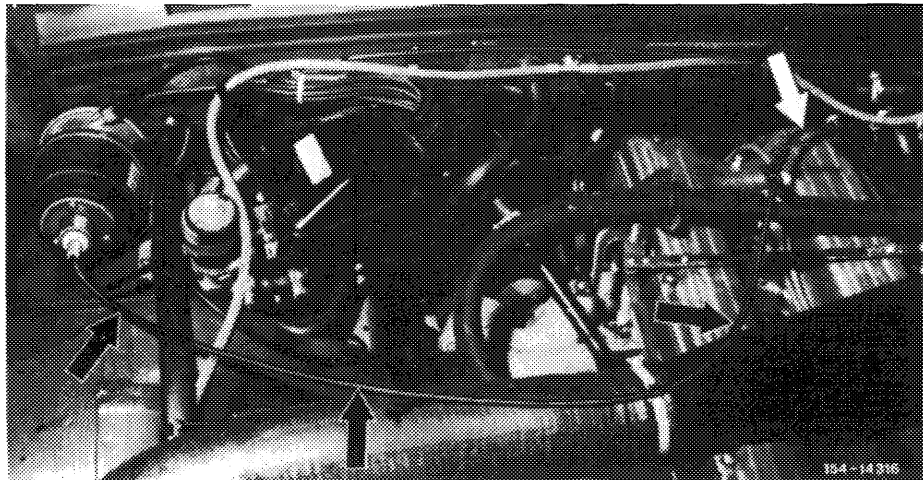

Install cable control models 116.024/025 with electronic injection system

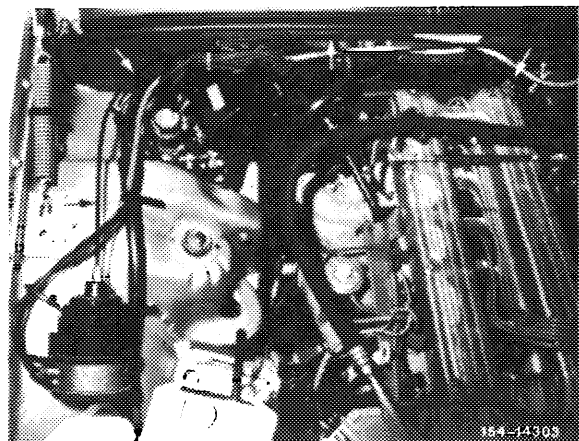

Install cable control models 116.024/025 with CIS injection system up to USA model year 1979, lefthand steering

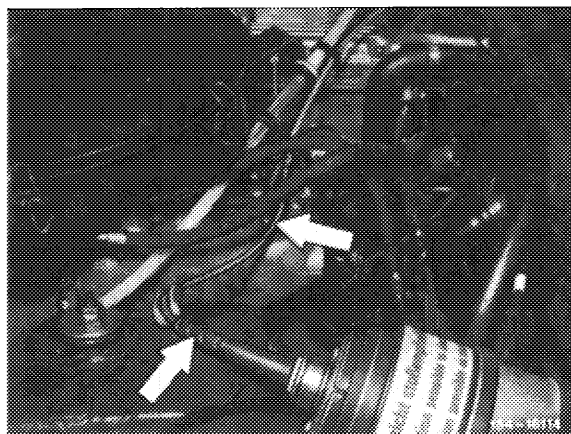

Install cable control models 116.024/025 with CIS injection system and air conditioning installed up to USA model year 1979, lefthand steering

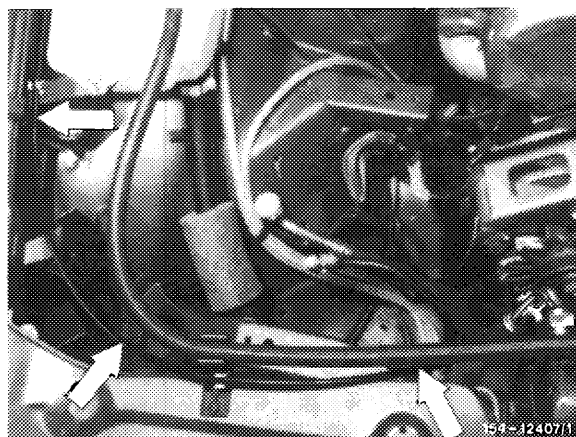

Install cable control models 116.024/025 with CIS injection system starting USA model year 1980, lefthand steering

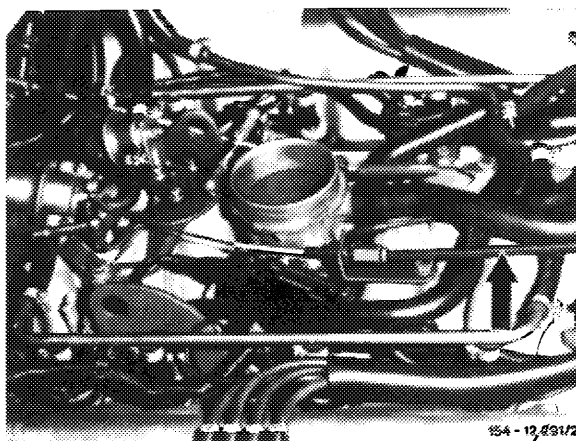

Install cable control models 116.024/025 with CIS injection system, righthand steering

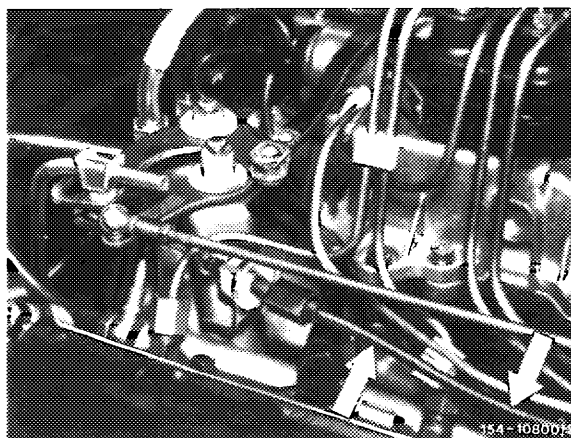

Install cable control models 116.028/029/032/033 on wheel house, lefthand steering

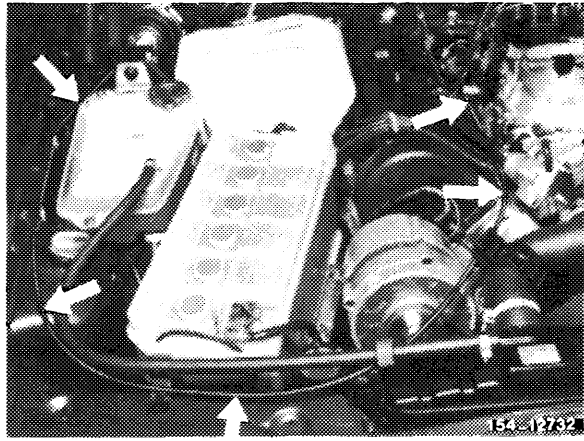

Install cable control models 116.028/029/032/033 with electronic injection system on engine, lefthand steering

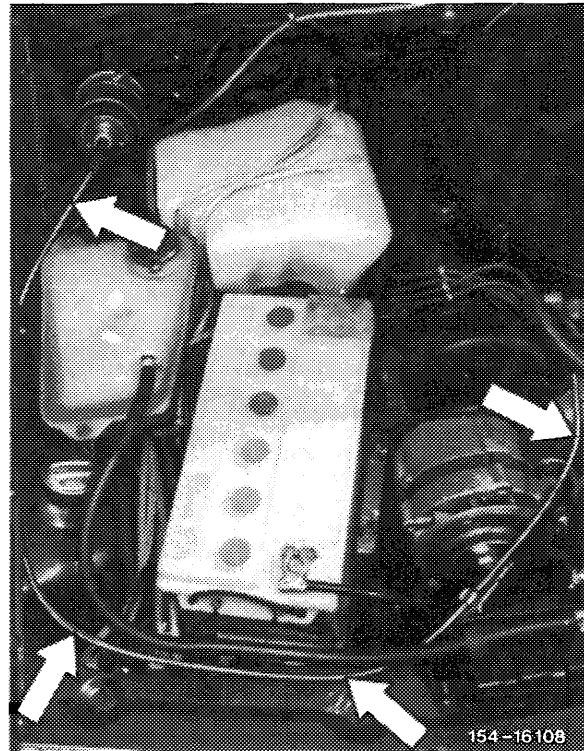

Install cable control models 116.028/029/032/033 with CIS injection system lefthand steering

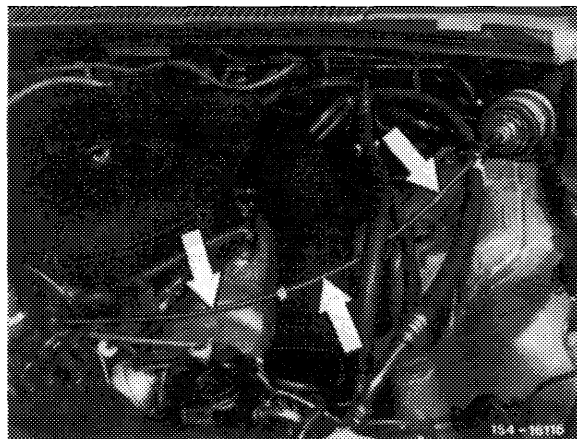

Install cable control model 116.036
(version 1) lefthand steering

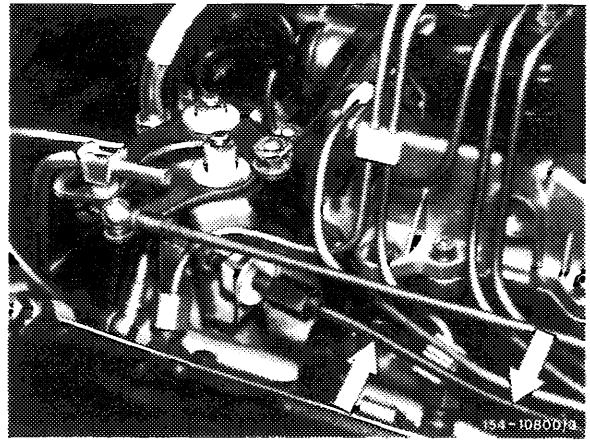

Install cable control model 116.036
(version 2) lefthand steering

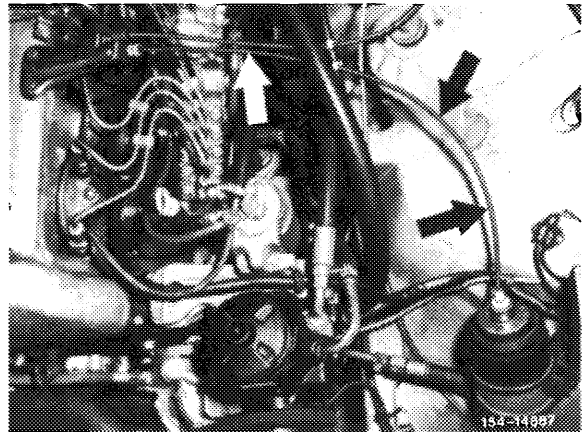

Install cable control model 116.028/029/03
with CIS injection system, righthand steering

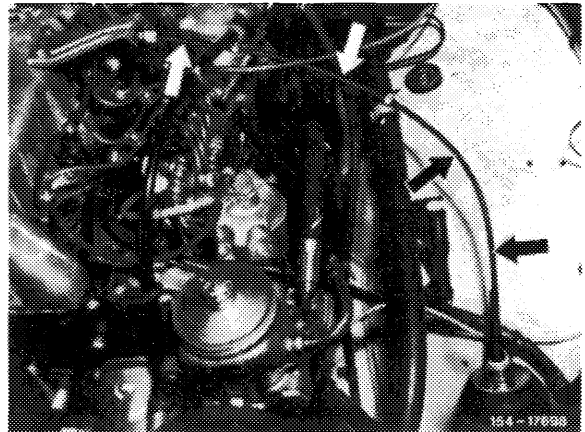

Install cable control models 116.028/029/03
with CIS injection system, righthand steering

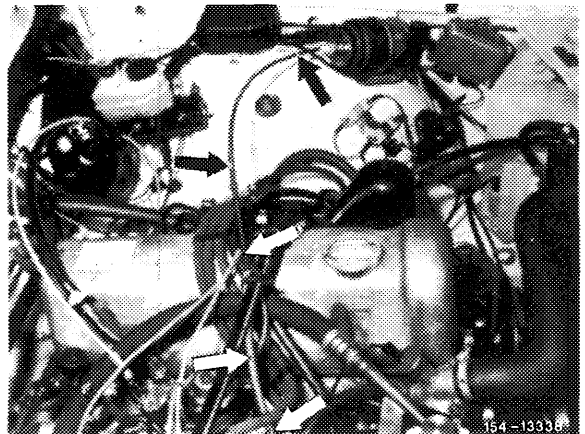

Install cable control model 116.120
up to USA model year 1979

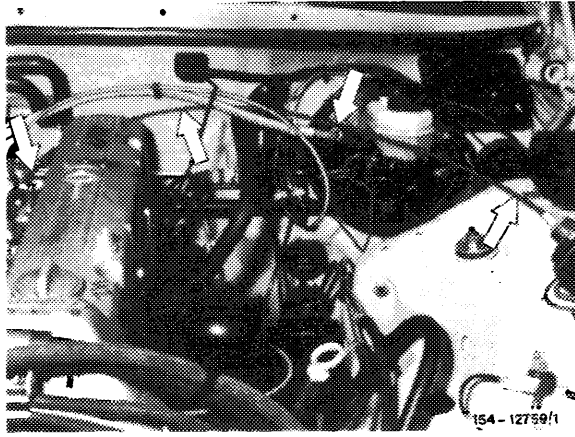

Install cable control model 116.120
starting USA model year 1980

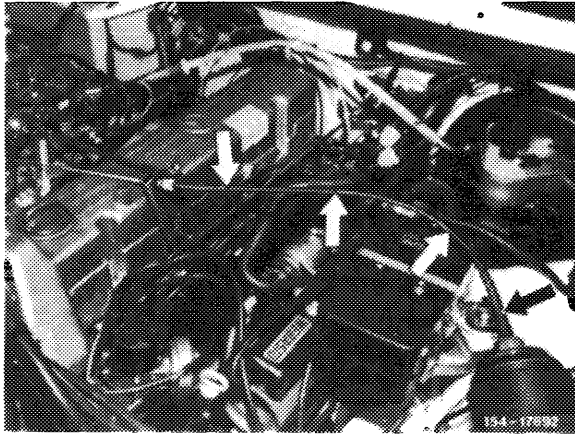

Install cable control models 123.023/083

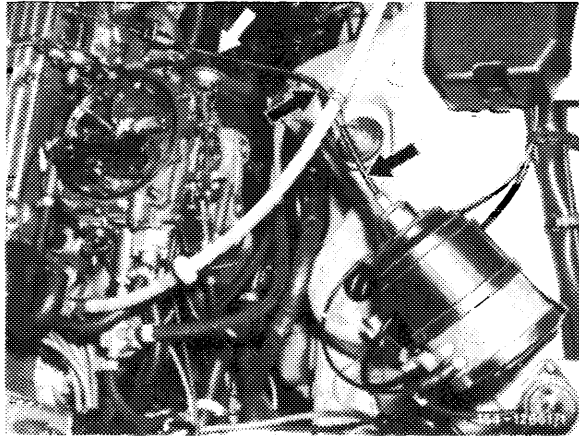

Install cable control models 123.026/086
without longitudinal regulating shaft

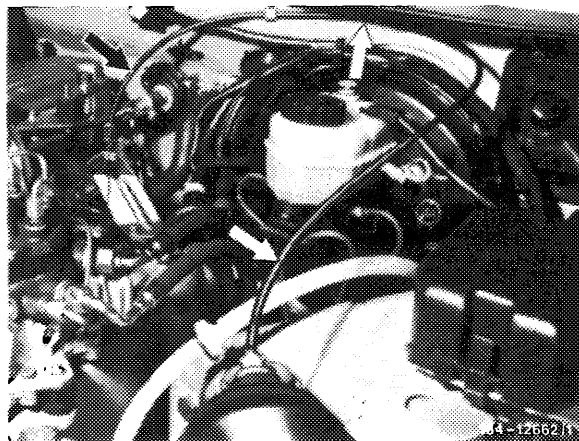

Install cable control models 123.026/086
with longitudinal regulating shaft

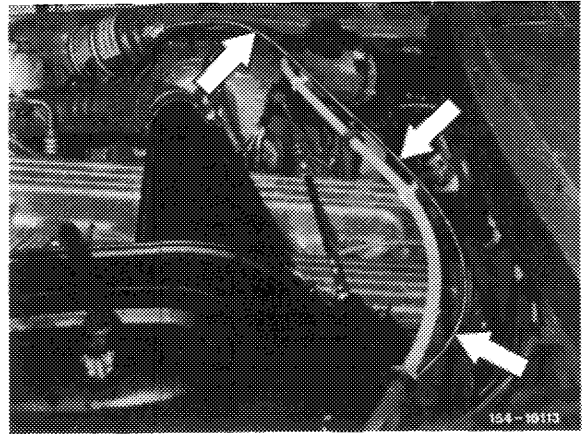

Install cable control model 123.030/050

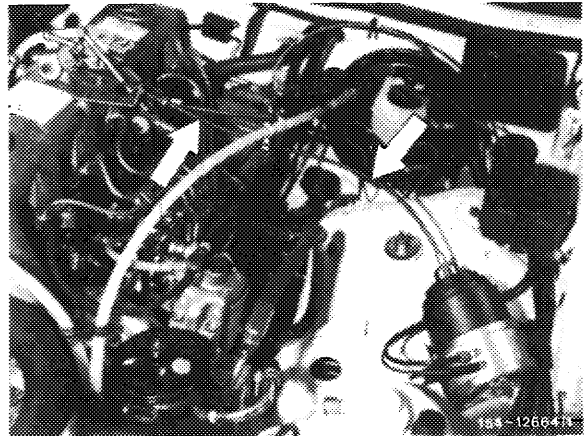

Install cable control models 123.033/053/093,
lefthand steering

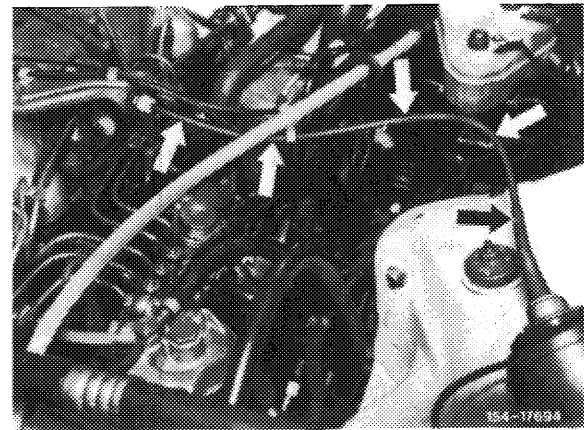

Cable control layout model 123.033/053/093,
righthand steering vehicle

Cable control layout model 123.123/130/150/183/190
lefthand steering vehicle without longitudinal regulating shaft

Cable control layout model 123.123/130/150/183/190
lefthand steering vehicle with longitudinal regulating shaft

Installation

- 6 For installation proceed vice versa.
- 7 Adjust cable control (54–560).
- 8 Operational checkup on road.

Cable control layout model 123.123/130
righthand steering vehicle
