

The electric connections for radio and automatic rear antenna, as well as the antenna cable are standard equipment on vehicles of series production.

Connecting cables for radio section are in radio cutout blindly insulated on harness.

The plug fuse (1) included in installation kit is fitted in fuse box. Cables (2) are insulated blind on harness.

Connections for rear antenna are accessible upon removal of lefthand lining in trunk.

Recesses for speakers are provided on instrument panel left and right.

Two additional speakers can be installed in hat rack.

The additional harness, as well as complete installation instructions, are included with respective radio set of radio manufacturer.
