

Three-point belt with automatic reel

made by Klippan

---

Model 116.020	up to chassis end No. 075 993
116.024, 025	072 157
116.028, 029	036 858
116.032, 033	058 918
116.036	001 650

**Note**

---

If the belt end fitting of the safety belt is damaged in the course of an accident, replace complete safety belt.

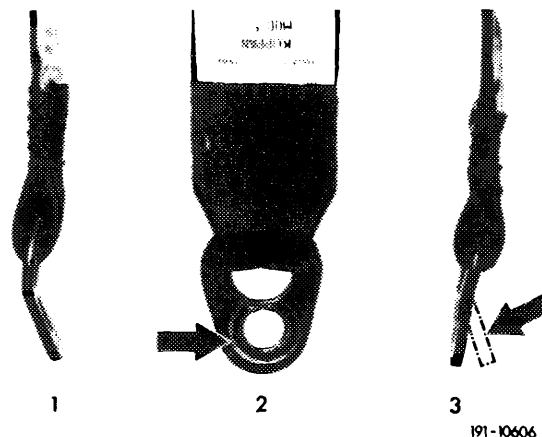

**Characteristic damage**

---

Belt end fitting is deformed, that is, the formerly off-set end is now straight.

Belt end fitting is damaged by fastening screw (arrow).

In addition, the plastic coating of the lock catch may show chafe marks and there may be bright spots at belt in range of belt guide fitting and catch.

- 1 Belt end fitting undamaged
- 2 Belt end fitting damaged
- 3 Belt end fitting deformed during an accident

Model 116.020	starting chassis and No. 075 994
116.024, 025	072 158
116.028, 029	036 859
116.032, 033	058 919
116.036	001 651

**Note**

Renewal of a complete safety belt or individual damaged parts, such as holders, lock or holding rail, depends on visible deformations.

**Characteristic damage**

1 Lock with holder begins to stretch. Driver's seat can still be correctly adjusted.

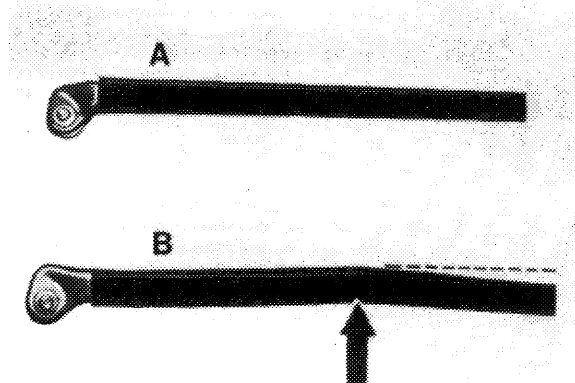

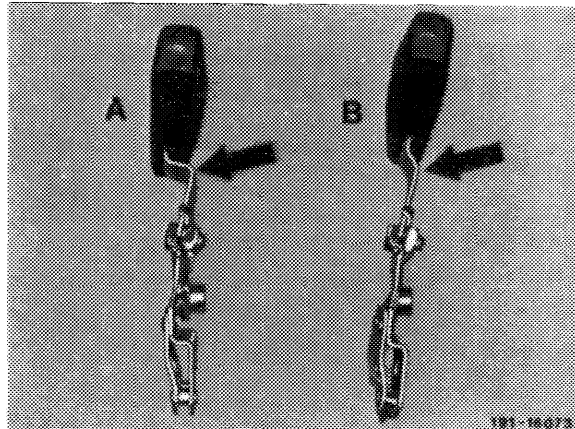

**Remedy:**  
Exchange lock and holder.

- A lock undamaged
- B lock deformed by accident

2 Holding rail deformed.  
Driver's seat can no longer be adjusted.

**Remedy:**  
Replace complete safety belt as well as damaged holding rail.

- A holding rail undamaged
- B holding rail deformed by accident
